◉ Proposed Elements of Bilateral Offset Credit Mechanism

◉ Purposes of the BOCM

- ◉ Contribute to the ultimate objective of the UNFCCC through promotion of mitigation activities globally.
- ◉ Facilitate the bilateral cooperation in the field of climate change in such a way that best suits each country's national circumstances.
- ◉ Contribute to the sustainable development of developing countries.
- ◉ Appropriately evaluate the contribution to GHG emission reductions or removals.
- ◉ Facilitate diffusion of low carbon technologies, products and services and enhance capabilities to utilize them.

Feasibility Studies on New Mechanism and on CDM/JI

Since FY1999, CDM/JI Feasibility Studies Scheme has supported on 183 projects, of which 11 projects have been registered as CDM projects by the CDM Executive Board. Starting from FY2010, feasibility studies have been undertaken for projects involving new mechanisms with an aim to accumulate knowledge and experience concerning the new mechanisms.

Feasibility Studies on New Mechanism and on CDM/JI in FY 2011

Development and Operation of an Information Platform

The New Mechanisms Information Platform was launched on April 2011. Based on the abovementioned experiences and network, it endeavors to introduce updated information on Japan's policies and measure to promote Bilateral Offset Credit Mechanism (BOCM), topics of interests on the development of international climate change negotiations and partnership among countries, and useful experiences such as past and ongoing practices etc. The New Mechanisms Information Platform also welcomes questions and comments from international stakeholders, including those who are interested in conducting mitigation activities using BOCM.

Offset Credit (J-VER) Scheme

- By utilizing the J-VER scheme, funds for carbon offsetting by individuals, businesses, local governments and others can be directed to local project proponents committing forest management or local industries.
- J-VER is one of the new mechanisms to promote the Japanese Green New Deal program against global warming, expansion of job opportunities, and economic measures by using private-sector capital.

Project Proponents

(Examples of applicable Reduction/sink project)

Forestry Biomass

※J-VER scheme is designed according to ISO.

(2)
Application

Submit a project design document

Submit a project planning form

Accredited Validator

(3) Public comment

(4) Validation

Submit a request for the project registration

MOEJ and secretariat of Offset Credit(J-VER) scheme

(1) Design and announce methodologies

Submit the latest project design document and a validation report

(5)

Registration
